

WORK SAFETY POLICY

Our employees are the most important resources of BDT and they guarantee the sustainable success of the company. Therefore, the work safety and the health of our employees are very important concerns for us. In order to offer our employees and the people working on duty for BDT a safe and resource efficient work environment, we act according to the following principles:

/// Situation Analysis

All workstations within BDT are evaluated in regard of work safety and ergonomics. The overall goal is to avoid accidents, work related illnesses, injuries and downtimes.

/// Reduction of Danger

We will try to avoid the use of hazardous substances within BDT. If the business operation does not allow this, we will minimize the use of those substances.

/// Training and Awareness

Our employees are trained frequently regarding work safety topics in order to increase the awareness for the necessity of the topic and the opportunities for individual and active preventive actions.

/// Legal Compliance

Legal compliance regarding work safety matters as well as the requirements of the BS OHSAS 18001 will be observed and implemented without exception.

/// Indirect Work Safety

Our suppliers should confirm their compliance of defined work safety standards by signing the BDT Code of Conduct.

/// Continuous Improvement

The continuous improvement of our work safety management system and further services for our employees are an important dedication for us.
